

## Exercise 9

### Communication Nets

### Unit 9

#### Purpose

The purpose of this exercise is to create an ICS Form 205 to address Command and tactical channel assignments. Consider assigning tactical channels for current and potential responders.

#### Objectives

Students will:

- Recognize the significant information received and draw conclusions to create a communications system.
- Recognize any incomplete information and ask questions accordingly.
- Students will complete an ICS Form 205 Radio Communications Plan.

#### Exercise Structure

This exercise is a continuation of the previous ICS 205 Radio Communications Plan exercises. It is based upon the receipt of new incident information that requires revision of the ICS 205 Radio Communications Plan. The exercise is scheduled to last approximately 45 minutes. The instructor will read an updated script from the City of Central City scenario (see Exercise Scenario Update). Based on this information, the students will discuss the significance of the information received and what conclusions to draw as they create an ICS 205 Radio Communications Plan.

#### Rules, Roles, and Responsibilities

Students will in small groups.

Following are the specific activities/ instructions for your participation in the exercise:

1. Review the information provided.
2. Complete the attached ICS Form 205 based on the ICS 217A located in the Central City tab, Tanker Accident Organization Chart, Harbor Division Map and updated information.
3. Make corrections according to the Instructor's feedback.

Instructors moderate discussions, answer questions, and provide additional information as required.

#### Exercise Scenario Update

Central City has experienced an event where a large marine tanker delivering crude oil to the refinery has impacted the pier. The tanker was significantly damaged and is leaking crude oil into the harbor. There is no fire currently, but there is significant potential. The crude flammable vapors are all around the harbor and generally heading towards the downtown area.

The agencies involved are: Central City Fire, Police, Public Works, State Police, State DNR, State Fire, Coast Guard and the Refinery. Mutual Aid is en route or on-scene from the from the State Law and Fire agencies as well as mutual aid from North, East, and West Cities.

Using the 217A Communications Resource Availability Form, participants will create an ICS Form 205 Radio Communications Plan that addresses a Command Channel, at least one Law Enforcement Tac, a DNR Tac, at least one Fire Tac, including the refinery security and the Coast Guard. They will plan for the NTSB, EPA, Spill Control companies and any other responders they think would attend.

### Suggested Question

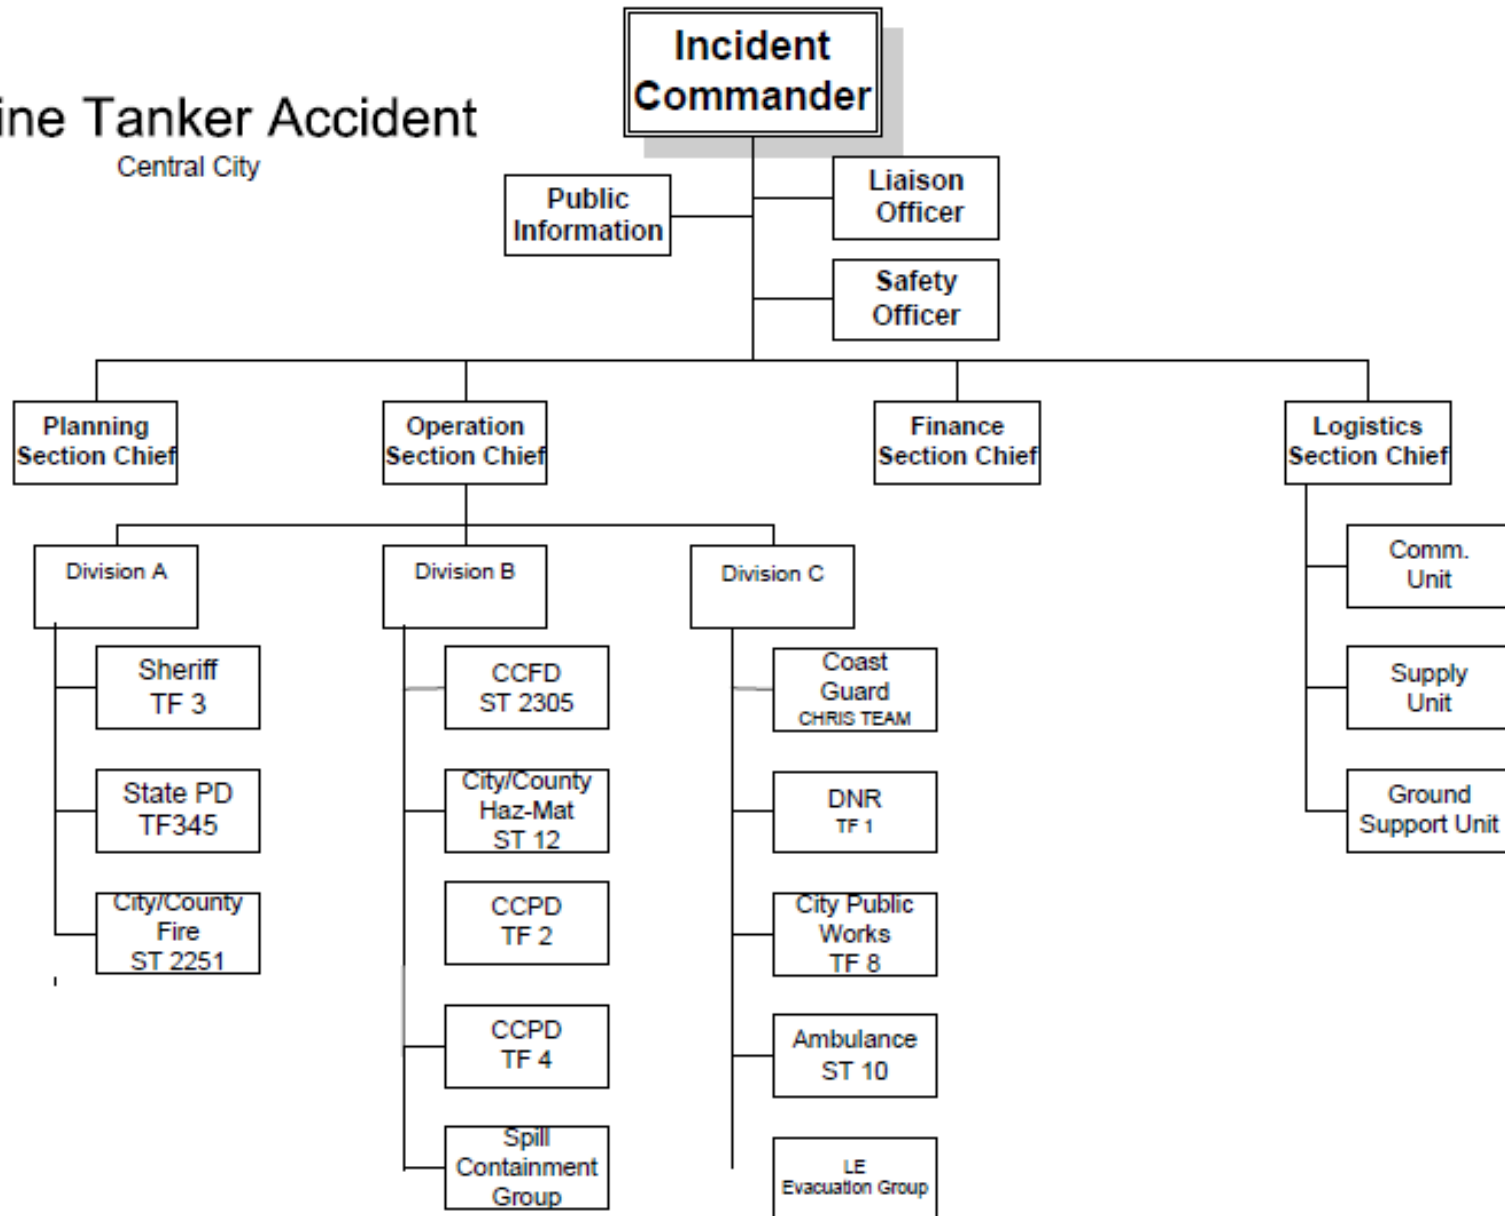

This is planning for the second operational period; all agencies have at least some assets at the scene. How would you design the communications systems to be used?

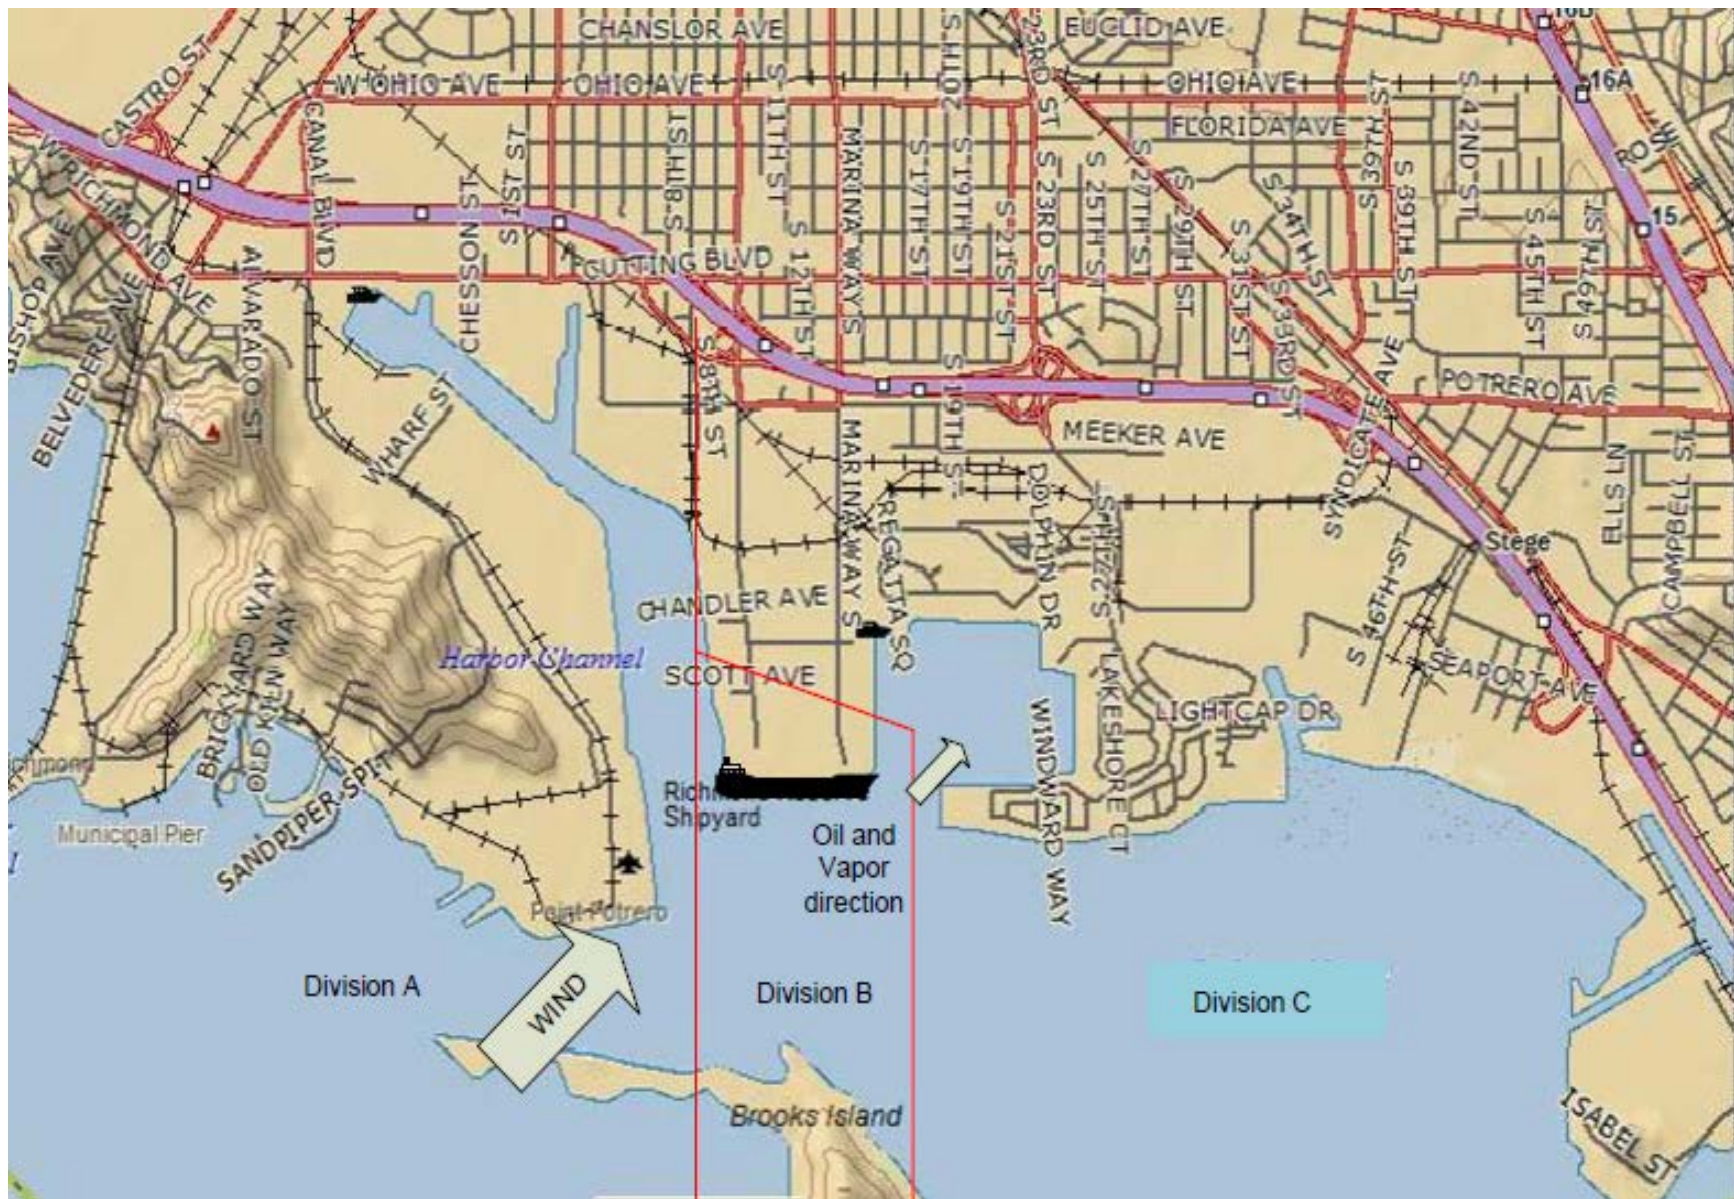

## Exercise 9 Schedule

Activity	Duration	Participation Type
Exercise Introduction	5 minutes	Classroom
Instructor Briefing	5 minutes	Classroom
Complete ICS Form 205	20 minutes	Individually
Review with Instructor	15 minutes	Classroom
