## Unit 7:

Develop and Disseminate the ICS Form 205 – Incident Radio Communications Plan

Visual 7-3

# ICS Form 205 – Purpose

---

- **The ICS Form 205 – Incident Radio Communications Plan is the “master communications plan” for the incident.**
  - **Provides information on all radio frequency or trunked system talk groups for each operational period.**
  - **Contains assignments of resources by COML.**
  - **Included in IAP**

## **Handout 7-1: ICS Form 205 – Incident Radio Communications Plan**

# ICS Form 205 – General Guidelines

---

- Incident Radio Communications plan includes:
  - Command Radio Network
  - Tactical (division) net requirements
  - Support net requirements
- Not all networks appear on the “official” ICS Form 205 Radio Communications Plan

Unit 7:

Develop and Disseminate the ICS Form 205 – Incident Radio Communications Plan

Visual 7-5

# ICS Form 205 – Specific Contents

---

- Important information includes:
  - Repeater locations
  - Incident location
  - Interoperable gateway locations and points of contact
  - Patched channels

**What other information might it be important to include?**

# ICS Form 205 – Preparation

---

- 1. Develop a list of needed functions**
  - **Who is here?**
  - **What divisions, groups, or tasks will they be performing?**
- 2. Work with the Operations Section Chief to determine required network assignments**
- 3. Create the ICS Form 205 – Incident Radio Communications Plan**

# ICS Form 205 – Distribution

---

- **Ensure a copy of the ICS Form 205 – Incident Radio Communications Plan is delivered to the appropriate Communications Point of Contact and any other regionally required personnel**
- **If field programming or cloning is occurring at the incident, validate the accuracy of the programming**

**How often should the ICS Form 205 – Incident Radio Communications Plan be re-evaluated?**

# Incident Radio Communications Plan Sensitive Info

---

- **Generally, IAPs become public information and radio programming information may become compromised through general distribution of the IAP beyond incident personnel.**

## Incident Radio Communications Plan Sensitive Info (cont.)

---

- **Department of Homeland Security (DHS) restricts the publication of detailed frequency and programming information regarding Urban Search & Rescue (USAR) and Disaster Medical Assistance Team (DMAT) channels to DHS -authorized personnel who have obtained the necessary clearances.**
- **Therefore, US&R and DMAT frequencies will not be published on an ICS 205, even if known to the COML.**
- **This same philosophy may apply to Bomb Squad, SWAT team, military teams, intelligence gathering, or other channels being used.**

# Incident Radio Communications Plan Sensitive Info (cont.)

---

## Encryption

- Agencies using encrypted radios that are included in a Gateway connection need to be aware all their transmissions will be unencrypted on the connected clear channels
